

# HOW TO INSTALL ALUMINUM GARDEN EDGING

- 16' length comes with 4 matching aluminum stakes.
- Edging comes in black or silver

## WHAT YOU WILL NEED

Spade

Hammer

Hacksaw

Extra Stakes

- Mark outline of garden to be edged with a garden hose or spray paint.

- Remove 1.5-2" or 3-5 cm layer of sod.

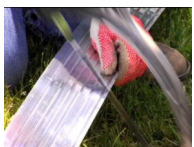

- Carefully spade trench outlining gardens 12-15cm deep, so that edging rests in trench.

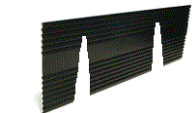

**\*Do not force.\***

- To join lengths of edging; interlock one into the other.

- Cut edging to required length.

- If steep pitch change is necessary "v" notch the bottom of edging.

# HOW TO INSTALL ALUMINUM GARDEN EDGING CONTINUED....

- If sharp corners are necessary use spade edge to bending edging. (This is permanent)

- Spike edging into the ground to secure at proper height.

- Backfill loose soil into trench on garden side of edging.
- Backfill on lawn side as needed.

- Leave soil on inside of edging low to allow for wood mulch or decorative stone.
- Build up garden with topsoil.
- Regrade/patch lawn where needed.
