PLANT A POLLINATOR GARDEN IN 2017

With increasing environmental concerns for agriculture, wildlife, and public health, advocating for pollinators has become increasingly prominent in recent years! Because of these trends we, here at Sipkens Nurseries, feel that we need to do our part to promote an increase in growing the appropriate plants for attracting pollinators. In this light, we have created the **NEW 2017 POLLINATOR PROGRAM.**

The 1 Rack Pollinator Program Includes:

24 flats of 9cm yellow perennials

24 flats of 15cm terra cotta perennials

Program is offered from the last week in April to the end of May.

USE THIS RACK TO ATTRACT:

BEES

BUTTERFLIES

HUMMINGBIRDS
